Hidden Figures is the incredible untold story of Katherine Johnson, Dorothy Vaughan and Mary Jackson---brilliant African-American women working at NASA, who served as the brains behind one of the greatest operations in history: the launch of astronaut John Glenn into orbit, a stunning achievement that restored the nation's confidence, turned around the Space Race, and galvanized the world. The visionary trio crossed all gender and race lines to inspire generations to dream big.

20thCenturyFox.

"The film hews closely to the facts in important respects, and evokes the outrages of the Jim Crow era, as well as the feverish competition of the space race, through the fascinating work of its extraordinary heroines." *Joe Morgenstern, Wall Street Journal*
